

HYDEK

**HYDRAULIC MAST-CLIMBING SYSTEMS.
UNPARALLELED SUPPORT.**

HYDEK's dual-mast hydraulic lift platform boasts the highest speed/load combination on the market today. The optimized engineering has struck the perfect balance between reduced piece count and greatest number of different configurations. **HYDEK** represents the ideal blend of intelligent design, versatility and safe, easy use. We promise an excellent product, unparalleled customer service and technical support, and the most competitive pricing in the mast-climbing systems market.

THE MARK II-724

USE BRIDGES TO EXTEND THE WORK PLATFORM OUT TO 64 FT, IN 2.5, 4, OR 8 FT INCREMENTS

FULLY COMPATIBLE WITH BENNU EQUIPMENT

POWERFUL & INTELLIGENT DESIGN

- Power up the Mark II-724 with a muscular 13 HP Honda engine.
- Ascend and descend at an industry-topping 8ft/min under 20,000 lbs. load.
- Transport up to 130 linear feet of work platform on a single drop deck.
- Mechanisms are housed beneath the work platform, shielding them from falling objects and damage.
- One-man operation; run the unit up and down with the controls alone—no resetting the equipment at the masts required.

VERSATILE

- Use IQAN for electronic control and to monitor the hydraulics, and take advantage of the modem capabilities to enable cost-effective remote access to the power unit.
- Use bridges to extend the work platform out to 64 feet, in 2.5, 4, or 8 foot increments.
- Assemble the exact configuration you need with the various outrigger and truss lengths and styles, and strengthen your work platform with stiffeners and cross boxes.
- Bridges can be used to make forward extensions anywhere you want, quickly and easily.
- HYDEK parts are fully compatible with Bennu Systems.

314 North Highland Ave NE, Atlanta, GA 30307

LIMIT BREAKDOWN TIME - CRITICAL COMPONENTS DON'T REQUIRE ADJUSTING

MECHANISMS ARE HOUSED BENEATH THE WORK PLATFORM

COMPONENTS ARE HOT-DIP GALVANIZED FOR ADDED PROTECTION AND DURABILITY

BE SAFE—ONE SAFETY DOG IS ALWAYS ENGAGED

The HYDEK Mark II-724 was tested in accordance with ANSI 92.9 horizontal loads, vertical loads and according to OSHA guidelines for vertical loading.

ANSI HORIZONTAL LOAD TEST

ANSI VERTICAL LOAD TEST

OSHA VERTICAL LOAD TEST

THE RESULT = EXCEEDS ALL TESTS

SAFE & EASY TO USE

- Enjoy simple, fast and safe assembly with the EZ Link System and pins.
- Limit breakdown time - critical components are always secure and do not require adjusting for transportation.
- Include a wheel kit for fast and efficient mobility around the job site.
- Be safe—one safety dog is always engaged in each tower.
- Control the unit with a single-lever.

CUSTOMER SERVICE & TECHNICAL SUPPORT

HYDEK technicians are fully-trained in the different HYDEK systems. Our response times are among the best in the industry and our techs are always available, professional, knowledgeable and reliable.

PRICE

HYDEK is the most competitively priced hydraulic mast-climbing system in the industry, and always provides excellent value-for-money.
